## OBJECTIVE

I am a driven, adaptable, and passionate engineer specialized in user experience, analytics design, and product development. This is complemented by an outgoing personality and entrepreneurial spirit. Looking for a challenging, team oriented environment.

## EXPERIENCE

### **Solution Engineer | Ciena**

2014 – PRESENT

UX Design and development lead of custom web applications. Project development covering customer interaction, requirement definition, schedule planning and Agile process implementation.

### **Product Marketing Coordinator | NexJ Systems**

SUMMER 2013

Leader of SAP analytic dashboard which included: translation of business requirements, contractor management, conducted feedback sessions, and comprehensive design review.

### **Interface Research Intern | ENAC**

FALL 2012

UI/UX design of a prototype interface for Paparazzi an open sourced software to automate the flight of UAVs. Primarily tasked with creation of SVG graphics.

## EDUCATION

### **Bachelor of Applied Science | University of Waterloo**

2009 – 2014

Graduate of Systems Design Engineering program with a specialization in user centered design and product design process

VP Education   Engineering Society	2012-2014
